TAPESH DUA

FULL STACK WEB DEVELOPER

MORE ABOUT ME

I spend my whole day, practically every day, experimenting with HTML, CSS, and JavaScript and inhaling a wide variety of information through Internet. I build websites that delight and inform. I do it well.

I'm curious, and I enjoy work that challenges me to learn something new and stretch in a different direction. The list of projects I follow on GitHub will give you a good idea of the types of tools I'd prefer to be using.
